Geneva awards for USM inventors

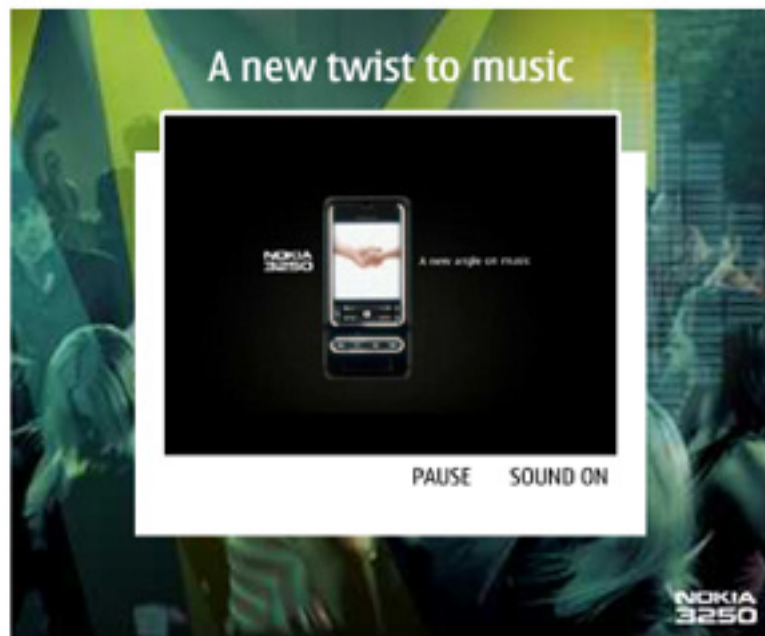

PENANG: All the 14 entries by Universiti Sains Malaysia (USM) at the 34th International Exhibition of Invention New Techniques and Products in Geneva, Switzerland, bagged an award each.

USM researchers took five golds, seven silvers and two bronzes at the recently concluded five-day exhibition.

USM acting vice chancellor Datuk Prof Muhamad Idris Saleh, in a statement, congratulated the 14 researchers, whom he said, had made the university proud.

Muhamad Idris, who is also the USM deputy vice-chancellor (Research and Innovation), said he hoped investors would get involved to commercialise the winning products.

He said the winning team were on their way home, adding that a press conference had been scheduled for tomorrow.
